C[ALIFORNIA PROJECT MANAGEMENT FRAMEWORK]~~alifornia Project Management Framework~~ – 4910.2

([New]Revised: ~~05/2016~~07/2026)

The California Project Management Framework (CA-PMF) has been designed as an adaptable resource that provides California public sector organizations with a~~n~~ standardized approach to project management that lays the foundation for project success. The CA-PMF ~~offers~~provides guidance and insight on project management methods and approaches through the use of scalable resources, tools, and templates. ~~The CA-PMF~~ It is intended as a practical and useful guide ~~to lead a~~ for Project Managers and project teams to plan, manage, and monitor ~~I~~Tinformation technology projects through the project management lifecycle for projects of all sizes so that ~~they achieve~~ expected outcomes are ~~acheived~~achieved. The framework ~~outlines~~ ~~supports~~ project management best practices that conform to industry standards as defined by the Project Management Institute (PMI) and the Project Management Body of Knowledge (PMBOK) adapted to the context of California State government.

~~The CA-PMF includes all major project processes and activities, from initial project definition to closing the project. With project management described as a series of activities undertaken by the project team, the Project Manager is equipped with the tools necessary to consider the needs of the project and how its organization can be structured and managed to deliver the intended result.~~ The CA-PMF aligns with State policy, identifies the connections to ~~the~~ project ~~oversight and project~~ approval processes and project oversight, and directs practitioners to the appropriate resources for further information on those processes.
