Hi!

As a renter I would like to encourage you to make EV charging a key part of MFH units that have parking included.

An equitable CALGreen code should require for all MFH units with parking:

- \* an EV space wired directly to the corresponding unit's electricity meter whenever possible;
- \* true EV Ready 'plug-and-play' charging access, via power to an electric outlet or an EV charging cordset;
- \* prominent labeling of EV charging spaces with highly-visible signage.

Thank you!  
Bryan
