Subject: EV Charging for multi family dwellings
Date: Friday, September 17, 2021 8:43:14 PM

CAUTION: This email originated from a NON-State email address. Do not click links or open attachments unless you are certain of the sender's authenticity.

The new building standards for EV Charging in single family homes are really good, but they currently only cover about 40% of multi family dwellings. Not every EV owner drives a Tesla and requiring all new apartments and condos to be accessible for all EV owners will help make it easier for more people to go electric. Thank you for considering this.

Jon Jenkins
