

## Historical Data Entry Workload

**Summary:**

There are seven years of historical data (2012-2018) stored in CCDA’s internal SharePoint site. In these seven years, CCDA has collected received a total of 26,954 historical case filing and case resolutions reports. (20,490 Complaints/Prelitigation Letters, and 6,464 Case Resolutions Reports).

Because the information that we received was variant since each legal community submits their case files/resolutions uniquely, CCDA staff will need to manually enter remaining information into our system.
