Building Standards Commission Meeting – Proposed CBC Ch. 11B Code Amendments

Dear Building Standards Commission: Please address the lack of proper procedure and the abridgement of the public participation in the development of proposed standards to provide accessible housing for persons with disabilities. Bring CA building standards into compliance with Federal law.

Support the position taken by Disability Rights California regarding the proposed access standards for housing which were deleted after being approved the Division of the State Architect's Access Code Collaborative and the CA Building Standards Commission Access Advisory Committee.

I work with an amputee gentleman in a care facility, I know how difficult it is.

Thank you

Sincerely,

Ardys De Lu
