

Dear Members of the CA Building Standards Commission:

Please accept the following comments for your review of the Division of the State Architect's proposed access standard changes to CA Title 24 for your consideration during the 45-day comment period ending Monday, October 22, 2018. Thank you.

Item 11Bo2: Curb ramps are needed on both sides of a street, and must not force people into vehicular traffic.

Item 11Bo3: Existing buildings must continue to have accessible exits. Eliminating this requirement violates GC4459, puts people in danger, and exposes businesses to liability.

Item 11Bo4: This would eliminate the requirement for roll-in showers in hotels with one guest room. Tubs and "transfer type shower compartments" are unusable for many disabled people.

Thank you for your consideration.

Sincerely,

Diane Moore
