

ADDENDUM to the FINAL EXPRESS TERMS

CALIFORNIA BUILDING STANDARDS COMMISSION

BSC 03/21

California Green Building Standards Code (CALGreen), Part 11

LEGEND for EXPRESS TERMS (California only codes - Parts 1, 6, 8, 11, 12)

- Existing California amendments appear upright
- Amended or new California amendments appear underlined

Correction to Final Express Terms dated November 3, 2021.

This addendum properly shows the proposed definition, EV Capable Spaces, underlined.

Background:

During the BSC's Green Building (GREEN) Code Advisory Committee (CAC) which met on April 28 & 29th, 2021, BSC proposed a new definition for EV Capable Spaces. The new definition text was properly shown with single underline indicating the definition is proposed new code language. The Initial Statement of Reasons (ISOR) clearly explained the proposed definition is new code language. However, during the 45-day comment period, held August 13 through September 27, 2021, the 45-day Express Terms did not show the new definition, EV Capable Spaces, underlined. The 45-day ISOR clearly explains that the proposed definition is new code language. The Final Express Terms posted on the December 2021 Commission Meeting web page does not show the definition as underlined. For full transparency, this addendum clarifies the oversight showing the proposed text underlined.

ITEM 2:

Rationale from the (ISOR): BSC is proposing to adopt a new definition for EV capable space to clarify the term as used within CALGreen and in the EV charging industry. This definition refers to a space which has capability or infrastructure to facilitate future EV charging. This proposed definition is being co-adopted with other state agencies DSA and HCD that are also proposing similar amendments. The proposed definition will add consistency for the various occupancies within the CALGreen code.

CHAPTER 2-DEFINITIONS

Reflecting the proposed definition post Code Advisory Meeting and posted during 45-day missing underline

ELECTRIC VEHICLE (EV) CAPABLE SPACE. A vehicle space with electrical panel space and load capacity to support a branch circuit and necessary raceways, both underground and/or surface mounted, to support EV charging.

CHAPTER 2-DEFINITIONS

Reflecting the proposed definition for the Final Express Terms with added underline

ELECTRIC VEHICLE (EV) CAPABLE SPACE. A vehicle space with electrical panel space and load capacity to support a branch circuit and necessary raceways, both underground and/or surface mounted, to support EV charging.
