Hello,

We need more affordable housing units in San Francisco since approximately 90% of applicants are below the poverty line.

Please increase the percentage of affordable housing units because more than 24,000 households apply for these units each year, competing with thousands of other households through lotteries, just to get on waiting lists.

There is a severe shortage of affordable housing which renders some households into homelessness. Inclusionary requirements serve the public good and support our goals to reduce homelessness and to stabilize our communities.

Enjoy your day.
