

## **Item 6: 2021 CCDA Strategic Goal**

**Strategic Goal 2021: Evaluate attorney compliance with the California Commission on Disability Access (CCDA) data collection mandate by researching Title III construction-related American with Disabilities Act (ADA) court filings and submission practices within the California federal district and state superior court systems.**

**Description of Goal:** The CCDA will conduct a data collection review within the sixty-two court systems (four federal district courts and fifty-eight state superior courts) in California to determine compliance levels for ADA Title III construction-related attorney submitted legal complaint filings in 2020.

From this research, the CCDA will recommend diverse outreach formats to an assortment of legal communities, in order to improve complaint submission rates and adherence to mandated requirements. Additionally, the CCDA will explore if the way the law was written and/or executed, impedes the goal of collecting the highest submission volume of ADA Title III construction-related cases documented within the California legal system.

### **Critical Path(s)**

- I. Step 1: Identification of the CCDA Research Project**
- II. Step 2: Collection of Data**
- III. Step 3: Analyzing Collected Data**
- IV. Step 4: Develop Outreach Tools to Address Attorney Non-Compliance**
- V. Step 5: Report Findings and Recommendation from Research and Outreach Efforts**
