

Application Dashboard

The Application Dashboard has been updated to include the following:

- New drop-down menu to select a specific school district from all school districts the user has been assigned access.
- New Prefix Matching and Partial Matching search function from the Application Dashboard. Users can now search by full or partial application numbers, school district name, school site name, etc. across all school districts the user has been assigned access.

Application Wizards

- Users can add comments related to the Construction Delivery Method to add context to the entry.
- Project Information Worksheet (PIW) – School districts may request OPSC delete PIWs created in error.
- *Fund Release Authorization* (Form SAB 50-05 and Form SAB 70-02) – Users can now “Duplicate as Draft” previously created forms.
- Updated the user interface in the Unused Sites Program application dashboards.

Bug Fixes

- Fixed an issue on the *Application for Funding* (Form SAB 50-04) where the unduplicated pupil percentage does not save or export to pdf.
- Corrected the default Student Yield Factor (.7) for unified school districts on the *Eligibility Certification/Projection* (Form SAB 50-01).
