## **Overview**

The Department of General Services (DGS) prepares the Surplus Real Property Annual Report to the state Legislature pursuant to Government Code Section 11011.

The 2020 Surplus Property Annual Report contains a summary of the status of the following categories of surplus real properties:

- Properties that have been sold or otherwise removed from the state's property rolls since the 2019 report. In 2020, there were four property sales with a total consideration of \$5.618 million.
- Properties that have been authorized as surplus and are pending disposition. There are currently 11 properties in this category. In addition, there are four armory properties that have been authorized for disposition as excess, pursuant to special legislation.
- Properties that have been identified as excess and are pending surplus authorization. There are nine properties in this category.
- Properties that have been identified for rescission of prior surplus designation.

The information in this report reflects the status of the properties as of 2021.

## **The Asset Enhancement and Surplus Sales Program**

The Asset Enhancement and Surplus Sales Unit of DGS' Asset Management Branch (AMB) is responsible for the disposition of state-owned real property that has been declared surplus to future state needs. The Legislature must declare the real property to be surplus and must authorize the director of DGS to sell, exchange, lease, or transfer the surplus real property pursuant to Government Code Section 11011 et seq. The objective of the program is to sell or otherwise dispose of surplus property in the best interest of the state by achieving maximum value; maximizing job creation; creating affordable housing; facilitating historic preservation and reuse; and returning property to local tax rolls.

## **Executive Order N-06-19**

On Jan. 15, 2019, Governor Gavin Newsom signed Executive Order N-06-19 to address the acute affordable housing crisis in California. The executive order directed DGS to inventory excess state real property, including property that had been authorized for disposition as surplus, that may be suitable for the development of affordable housing. Pursuant to the executive order and in consultation with the Department of Housing and Community Development, DGS screened state properties, including all excess and surplus property, to determine their suitability for development of affordable housing. For properties potentially suitable for affordable housing development, DGS is seeking housing development via long-term lease, property exchange, or sale.
