1. AUTHORITY

This bulletin is issued pursuant to the authority granted by California Government Code Section 4460, which authorizes the Department of General Services, Division of the State Architect (DSA) to grant exceptions to the product approval of detectable warnings and directional surfaces.
2. BACKGROUND

Federal and California state regulations currently require detectable warnings and directional surfaces that warn blind or visually impaired persons of hazards, or that provide for directional wayfinding.

The 2007 triennial edition of the California Code of Regulations (CCR), Title 24, contains regulations aimed at implementing Section 4460 of the California Government Code. Under these regulations; detectable warning products and directional surfaces require evaluation and product approval by an independent entity selected by the Division of the State Architect as set forth in CCR, Title 24, Part 1 (California Building Standards Administrative Code), Chapter 5, Articles 2, 3, and 4; Part 2 (California Buildings Standards Code) Sections 202, 1107A.4-D, 1107A.9-I, 1112A.9, 1102B, 1121B.3.1 Items 8(a) and 8(b), 1127B.5 #7, 1133B.8.5; Part 12 (California Referenced Standards Code) Chapters 12-11A and 12-11B.

3. SUMMARY

The development of an evaluation and approval program for detectable warning products and directional surfaces is currently underway.

Until the DSA evaluation and product approval program for detectable warning products and directional surfaces is implemented and product approvals can be issued, DSA will accept a written five (5) year product warranty provided by the manufacturer of detectable warning products and directional surfaces. Such warranty shall indicate compliance with architectural standards as published in the current edition of the California Building Standards Code, and also include durability criteria which indicate that the shape, color fastness, confirmation, sound-on-cane acoustic quality, resilience, and attachment will not degrade significantly for at least five (5) years after initial installation.

As used in this bulletin, "not degrade significantly" means that the product maintains at least 90 percent of its approved design characteristics, as determined by the enforcing agency.

NOTE: Consult with the Department of Housing and Community Development (HCD) when these products and surfaces may be mandated for use in residential housing.
4. QUESTIONS
